Tulsa Warehouse

Tulsa, Oklahoma is centrally located near the banks of the Arkansas River just off Interstate Highway 244 in downtown Tulsa, and easy access to Interstate Highways 40 and 35. This gives Tulsa a one to two day delivery time to major cities in the West South Central region.

Tulsa Cold Storage is the newest addition to the American Cold Storage family. The warehouse is concrete pre-stressed double-tee construction with 1,200,000 cu. ft. The warehouse is cooled with a brine refrigeration system and is configured to accommodate products with temperature needs ranging from -10°F to 0°F. For protection of your product, this facility is fully racked with over 5,000 pallet positions. We track your product with computerized inventory control.

To accommodate and meet your shipping needs, we have a weekday schedule of 7:00am to 11:00pm a day. Our cooled dock is fully enclosed with 14 truck doors. Central Station Alarm system provides 24-hour a day monitoring of fire, burglar and refrigeration systems
